Greenhouse Gas (GHG) Responsibility

At Clifford Paper we are dedicated to sustainability and recognize the importance of taking proactive measures to protect the environment.

Our current scopes 1 and 2 are minimal as we have been proactive in taking measures to be responsible for and reduce our GHG emissions.

We commit to maintaining or improving this minimal GHG profile for scopes 1 and 2.

Beyond commitments we recognize the importance of sharing our progress. Therefore, we will continue to regularly monitor and share our GHG emissions data with our supply chain partners as well as any reduction efforts, demonstrating our commitment to sustainability.

Sincerely,

Scott J. Clifford
CEO
Clifford Paper, Inc.
